

CASE STUDY

TRADER ON THE STREET

Everyday People Becoming Profitable Traders through Trader on the Street

What is Trader on the Street?

After seeing the devastation left in the wake of the 2008 economic recession, Shawn Lucas set out to travel the world, teaching everyday people how to make passive income through trading currencies. With 20+ years of experience in the financial markets, Shawn has naturally become a trading expert, and his facility in economic analysis allows him to pull profits out of the markets with incredible consistency. The motto for Trader on the Street was simple: make more in one hour than the everyday person makes in an entire day at their 9 to 5 job. And that mission has spread to virtually every corner of the globe, bringing Wall Street-level income to Main Street.

There have been hundreds of traders that have sat down with Shawn, whether in person or through the power of the internet, and taken control of their own financial future. And the results speak for themselves. Trader on the Street continues to grow, and as that growth expands, Shawn can reach more and more people around the world. From the California coast to the north of France, Trader on the Street is proof that passive income is possible through trading, and it can be done virtually anywhere!

Now, wherever Shawn goes, traders follow. It's a reputation he has amassed through his years of success in the currency markets.

But Trader on the Street doesn't stop there. Inside, there's a stacked library of trading content. From

SHAWN LUCAS

Trader on the Street

Shawn Lucas began his financial career working for some of the biggest investing firms in the world like Fidelity and Charles Schwab. Now, he is using his expertise to teach people from all walks of life how to achieve financial freedom through trading. With incredible facility in the field of economic and technical analysis, Shawn Lucas has helped thousands of traders of all skill levels increase their performance and turn them into profitable traders.

live trading sessions to strategy guides, and weekly classes, Trader on the Street is a complete trading experience. And it's specifically designed to turn any level of trader into a fully independent trader, capable of taking what they learned and making their own income day in and day out. Regardless of skill or experience level in the financial markets, there is something for everyone through Trader on the Street. And members get to access this fountain of information at the click of a button!

This case study pulls three traders that have traded with Shawn and dives deep into what patterns they used, how they used them, and how much profit overall was made after one trading session. Here, we will explore what separates certain market patterns from others, why they happen, and how traders can set up their trades to maximize profit margins. Each pattern has a different outcome, but Shawn Lucas' expertise guided these novice traders to fantastic results.

The Traders

First and foremost, let's meet the traders featured in the case study. Each came from all different walks of life, and while one had previous trading experience, the other two were complete novices to the ins and outs of currency trading. However, as Trader on the Street has proven time and time again, anyone can reap the benefits of trading in the Foreign Exchange market. These traders were chosen because the patterns they used to turn in profits are some of Shawn Lucas' favorites to trade.

You can find more of these strategies with detailed guidebooks on traderonthestreet.com

Let's meet the guest traders that made real profits with Shawn Lucas trading live on Trader on the Street.

SHARON DALLAS, TX

As a nurse, Sharon's life was comfortable, making great income. But that all changed the moment she was in a car accident. Now, after losing that income due to the injuries suffered, Sharon had to find a new way to make money. She knew about trading, but had never received formal training. Then, she found what Shawn Lucas offered, and it was exactly what she was looking for. She was chosen as the guest trader in one of Trader on the Street's trading rallies in Dallas, Texas. And she experienced what it takes to overcome market drawdowns, and scale out profits in a long-winded trading session.

SAUL ISRAEL

Saul applies the same level of patience and understanding required of his day job as a teacher to his trading. Starting off as a teacher in Mexico, Saul started trading years ago through the Apiary Fund, Shawn Lucas' other trading education program, and unlocked a funded account. He then used the money saved from his trading to enhance his education and travel to Apiary Fund's live bootcamps. These are designed for traders to get a funded account of learn to grow it. There, he was able to increase the capital in his funded account and trade full-time. He is now in Israel, still teaching, and has made trading one of his main sources of income.

JACKIE SAN FRANCISCO, CA

As a nurse, Sharon's life was comfortable, making great income. But that all changed the moment she was in a car accident. Now, after losing that income due to the injuries suffered, Sharon had to find a new way to make money. She knew about trading, but had never received formal training. Then, she found what Shawn Lucas offered, and it was exactly what she was looking for. She was chosen as the guest trader in one of Trader on the Street's trading rallies in Dallas, Texas. And she experienced what it takes to overcome market drawdowns, and scale out profits in a long-winded trading session.

CONSOLIDATION PATTERN

In currency trading, a trending market doesn't last forever. And so, trading takes a "break" before resuming in the same direction or a new one. That's why it's important to look for certain signals on the charts that indicate the trend will resume. Sometimes, when trading takes a standstill, it forms a consolidation pattern, which is often identified by its sideways momentum, rather than moving up or down. These patterns differ between what was previously bullish or bearish momentum. Here are some examples of consolidation patterns and where trades are often placed.

Become a member of Trader on the Street to learn more about chart patterns.

Falling Wedge

Bullish Rectangle

Bullish Pennant

Rising Wedge

Bearish Rectangle

Bearish Pennant

When looking for consolidation patterns, it's crucial to spot where trading pauses, which means it's in a corrective phase before continuing along the same trendline. It's all about momentum. So trading these patterns is all about placing trades above or below the particular formation. And the profit targets are along the highest or lowest point of the pattern. Simply put, along the new support and resistance lines the pause in trend has created.

THE SETUPS

JACKIE

REVERSAL BREAKOUT PATTERN

As opposed to consolidation patterns, reversal patterns indicate that the trend is more likely to change course, often with great momentum. For example, when trading a bullish trend and a new pattern like the examples below begins to form, then the hint is that that bullish trend will now reverse to bearish. The opposite goes for when trading on a bearish trending market. With reversal patterns, as well as trading any other patterns, it's important to remember the use of stop loss orders. These can prevent trades placed from turning against the trader in the event of what's called a "fake-out," which should be self-explanatory.

Double Top

Head & Shoulders

Rising Wedge

Double Bottom

Inverse Head & Shoulders

Falling Wedge

Essentially, what reversal breakout patterns reveal about trader and market sentiment is a shift in supply and demand of a particular currency. And this change offers opportunities for entries and exits in the short-term. However, it's also crucial to differentiate between continuation and reversal patterns. Therefore, patience is required at all times to properly identify where price action is headed.

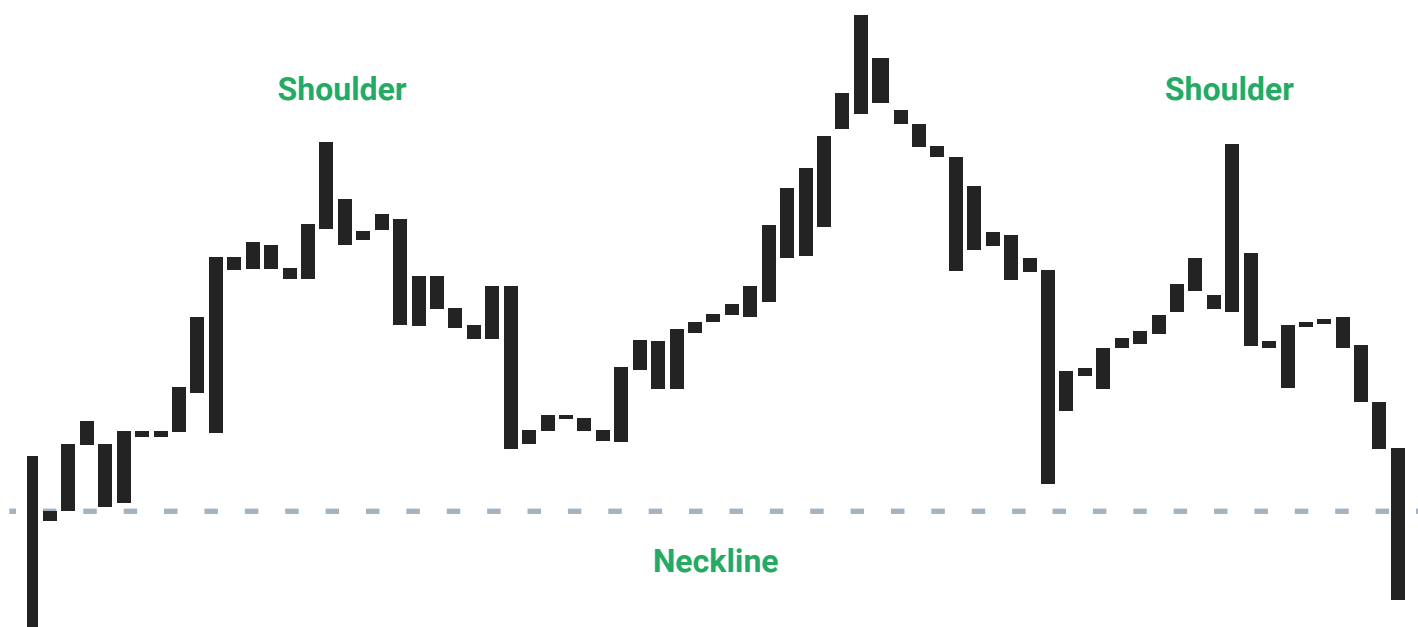

THE SETUPS

SAUL CHART PATTERNS

In trading, traders can chart patterns form every day. And each one has a different outcome. For technical analysis traders, they remain an integral part of their overall trading strategy. And two things need to be kept in mind when looking for certain chart patterns. For one, the trader must know how the pattern will perform. Secondly, the traders must know what they aim to get out of the pattern's movement. Here are three of the most common ones traders of all skill levels will encounter.

I Head & Shoulders

This kind of pattern is characterized by a large peak with two smaller peaks on either side of it. Even though the first and third pattern are smaller than the second, they all have the same support level, often called the "neckline." This is a bullish to bearish trend reversal. So, once the third peak falls below support levels, that indicates a bearish trend is now occurring.

| Flags or Pennants

As is indicated by the name, flags or pennants are identified by a wide opening that starts to tighten and become smaller. These patterns form when a trending market later experiences a level of consolidation. These can be both bullish and bearish trend continuation patterns. However, they can also signal reversals.

| Wedges

There are two kinds of wedges: rising and falling. And both are formed when price is beginning to restrict between two sloping trend lines. They often have a slanted level of support or resistance, as opposed to horizontal.

Rising wedges is a trendline caught between a resistance line that is steeper than the support. Therefore, it's signaling it will eventually break through resistance into an uptrend.

Falling wedges, on the other hand, have a downward slope. So, the support level is steeper than resistance. As such, it will likely break support and begin a bearish trend.

Rising Wedges

Falling Wedges

THE RESULTS

PAYOUTS

Each of these traders experienced one or more of these setups. How did they get along? Let's take a look at their results after one trading session with Shawn Lucas. You can also have results like this by being the guest trader when you become a member of Trader on the Street.

SHARON	\$1,123.23
JACKIE	\$932.81
SAUL	\$1,316.15
